

BRINKER'S FUELS
DOYLESTOWN, PENNSYLVANIA

Brinker's Fuels of Doylestown,

Pennsylvania is a retail fuel oil, diesel, and gasoline storage terminal. It includes a service center for heating and cooling sales, installations, and repairs. It also includes a motor fueling facility for gasoline and diesel commercial vehicles. Brinker's Fuels is part of Heating Oil Partners, L.P.

ENVIRONMENTAL PERFORMANCE

Past Accomplishments

Brinker's Fuels has demonstrated its commitment to environmental performance in the areas of reduced hazardous materials use and reduced vulnerability and potential for releases. Since 1997, the facility has:

- **Reduced hazardous materials use** by replacing chlorinated solvents used for equipment cleaning and maintenance with non-chlorinated, nonhazardous cleaning agents.
- **Reduced vulnerability and potential for release** through a variety of measures including: inspection of all in-service aboveground storage tanks, cleaning up BTEX-contaminated soil, installing a piping solenoid to prevent more than one storage tank from dispensing at a time, expanding concrete pad under gas filling station, and installing security fencing.

Future Commitments

Brinker's Fuels also committed to continued environmental improvement through reducing emissions of particulate matter, reducing energy use, reducing vulnerability and potential for release, and reducing hazardous waste. By 2003, the facility will:

- **Reduce emissions of particulates** by expanding its Preventative Maintenance Inspection to an additional 120 customers. Each inspection typically decreases a customer's particulate emissions by 20%.
- **Reduce energy use** by expanding its Preventative Maintenance Inspection to an additional 120 customers. Each inspection typically reduces a customer's energy use by 2.75%.
- **Reduce vulnerability and potential for release** by instituting a First Fill Inspection Policy for new customers. The policy will lower the incidence of accidental oil spills on customer premises

AT A GLANCE

Industry Sector:	SIC 5983
Business:	Retail fuel oil, diesel, and gasoline storage
Facility Employees:	50 - 99
Accomplishments:	Reduced hazardous materials use Reduced vulnerability and potential for release
2003 Commitments:	Reduced emissions of particulates Reduce energy use Reduce vulnerability and potential for release Reduce hazardous waste
Address:	445 North West Street Doylestown, PA 18901

and prevent misdeliveries.

- **Reduce hazardous waste** by 1193 gallons of waste #2 fuel oil per year through recovering oil accumulated from filter changes on customer's fuel tanks. The facility will filter the oil and use it for heating facility buildings.

COMMUNITY OUTREACH

Brinker's Fuels' General Manager is the point of contact for all community concerns. The facility is developing a website that will include the annual performance report and other environmental information along with general company information.
